

Eating in the Amazon Rubric – Individual Rubric

	5	3	1
Requirements included	I had all of the required elements (appetizer, entree, dessert and drink).	I had many of the requirements but not all.	I had only half or less of the requirements.
Food Choices	Each menu item contains 2 or more ingredients/foods from the rainforest. I clearly described how each dish is prepared.		I only had single items for each dish or did not clearly describe how any of the food was being prepared. For example, Dessert – banana.
Cost of items	I gave a clear explanation of why certain items were expensive or inexpensive.	I briefly mentioned cost, but didn't really explain how they picked prices.	I did not mention the cost of items in our final product.
Currency	I picked a creative type of currency that would be common in the Amazon.	I picked a creative type of currency, but it really had nothing to do with the Amazon.	I used American currency (dollars and cents).
Creativity	My final project was very creative. It is clear that a lot of effort went into creating the final product. I have pictures and detailed writing describing the food.	I put some time into the final product, but did not do much to make it stand out. There are some pictures and some writing but it is not very descriptive.	My product was done quickly and did not stand out. I did not include pictures and/or writing for each item. Even I was bored watching my presentation.
